START FAQs

What is the purpose of this packet? Why am I receiving it?

This packet is designed to provide help and information for people in need of treatment for addiction. This packet is being distributed to people who have been impacted personally by addiction or substance abuse. This information may be helpful to you or to a loved one.

Why do I need treatment now?

If you have just overdosed, you are at the greatest possible risk of overdosing again. If you have not overdosed, treatment may prevent you from experiencing an overdose or other negative consequences.

What is in the packet?

The packet contains information on treatment resources for addiction and mental health that can help individuals and their family members.

Will I get in trouble if I don't open it/use it?

No – but help is available to stop the destructive cycle of addiction that you may be experiencing.

Is the Narcan training really free? Who can go? When are the sessions? What is involved? How do I sign up?

Yes, the Narcan trainings are really free. Anyone can attend. This is especially helpful for someone who is at risk of an opioid/heroin overdose and/or their friends and family. The sessions are on the first Wednesday and second Thursday of the month (see flyer in packet for details). Attendees will also receive a free Narcan kit and a voucher for free treatment. To sign up, call 908-722-1232.

I do not have health insurance but need immediate treatment. How do I figure out where to go?

Even without health insurance, many people with a lower income level are eligible for very low cost or free treatment. Call the NJ Addiction Services Hotline (included in packet) at 1-844-276-2777. They will assess your needs and look at your income to assist in referring you to the best, most-effective treatment option available.

I have Medicaid and need immediate treatment. How do I figure out where to go?

Call the NJ Addiction Services Hotline (included in packet) at 1-844-276-2777. They will assess your needs and link you to a local provider that accepts Medicaid.

I have Medicare and need immediate treatment. How do I figure out where to go?

Call Medicare at 1-800-633-4227. They will assess your needs and link you to a local provider that accepts Medicare.

I have private health insurance and need immediate treatment. How do I figure out where to go?

Each health insurance company differs in its services. Call the Membership Services telephone number, found on your insurance card, to receive a referral to a local treatment provider that accepts your insurance.

I have questions or comments about this packet. How can I give feedback about it? Will anyone be able to tell that I answered it/track me?

Completing the survey will allow us to know how many packets are being received and utilized and also to see which pieces of information are most helpful so that we can provide the most useful, efficient information to you. You can provide your feedback to us by completing the enclosed survey online at www.tinyurl.com/STARTpacketsurvey. You can also complete the survey or ask questions by calling Cheryl at EmPoWER Somerset at 908-722-4900.

BEHAVIORAL HEALTH SERVICES

ABOUT THE PROGRAMS

Robert Wood Johnson University Hospital Somerset (RWJ Somerset) provides comprehensive inpatient and outpatient behavioral health services including treatment modalities for individuals with serious mental and/or behavioral health issues.

Our collaborative, interdisciplinary approach for patients 18 years and over, includes board-certified psychiatrists, psychiatric advanced practice nurses, licensed clinical social workers and counselors, registered nurses and occupational therapists.

New Jersey 911 Lifeline Legislation

CALL 9-1-1 if you see the following signs of alcohol poisoning:

- Passing out, semi-conscious
- Cold, pale or bluish skin
- Vomiting
- Slow or irregular breathing
- Seizures

Purchasing, possessing or consuming alcohol is illegal for those under the Minimum Legal Drinking Age of 21. This legislation provides immunity from prosecution when the steps below are followed:

1. **Call for Help.** An underage person calls 911 and reports that another underage person is in need of medical assistance due to alcohol consumption. The underage person is the first person to make the 911 report.
2. **Stay with your Friend.** The underage person (and, if applicable, one or two others acting in concert with the underage person who made the 911 call) remains on the scene with the underage person in need of medical assistance.
3. **Talk with Authorities.** The underage person who called 911 and, if applicable, one or two others acting in concert with the caller, provide each of their names to the 911 operator and cooperate with medical assistance and law enforcement personnel on the scene.

The underage person who is receiving medical assistance is also immune from prosecution. This immunity applies to public and private property.

Overdose Prevention Act (Good Samaritan Law)

**Don't Run
Call 911**

New Jersey's
Overdose
Prevention Bill
Will Protect you

Passed April 29, 2013

New Jersey Gov. Chris Christie signed a law that encourages people to report drug overdoses without fear of being arrested. Under the law, those who call 911 to report overdoses will be immune from arrest and prosecution for drug possession. The law also applies to the person overdosing.

This Act is designed to encourage overdose victims and witnesses to seek medical assistance in the event of an overdose emergency. Although effects of a drug overdose can be reversible with prompt medical attention, studies show that help is rarely sought in these situations. By guaranteeing limited legal protection from arrest and prosecution, this law eliminates fear as a major barrier for seeking help.
