Farm Registration Guidelines

Per The New Jersey Division of Fire Safety all commercial farm buildings need to be annually inspected. N.J.S.A.52:27D-192 et seq. (P.L. 1983, CHAPTER 383, approved November 12, 1983) applies to all buildings, structures and premises, other than an owner-occupied building used exclusively for dwelling purposes and containing fewer than three dwelling units. Accordingly, annual fire inspections of commercial farm buildings by the local enforcing agency and abatement of any violations cited is required.

A commercial farm is defined by the Department of Agriculture N.J.A.C 4:1C-3:

- A farm management unit of five or more acres producing agricultural or horticultural products worth \$2,500 or more annually, and satisfying the eligibility criteria for the Farmland Assessment act; or
- A farm management unit less than five acres, producing agricultural or horticultural products worth \$50,000 or more annually and otherwise satisfying the eligibility criteria for the Farmland Assessment Act; or
- A beekeeping operation farm management unit that produces honey or apiary-related products, or provides crop pollination services, worth \$10,000 or more annually.

A commercial farm may comprise multiple parcels, whether contiguous or non-contiguous, provided they are operated together as a single enterprise. All of these parcels together as a single enterprise. All of these parcels together are the commercial farm's "farm management unit".
