

Get Tested for Covid-19 Following the Holidays

News Release Date

01-02-2023

With Covid rates high in our region, holiday gatherings have been an opportune time for the virus to spread. As school and offices reopen, we encourage everyone who was exposed or is experiencing symptoms to get tested. Do not assume it is just a cold.

While vaccines are highly effective at preventing hospitalization, breakthrough infections have become more common with new variants. Testing is available at the

municipal center with expanded hours. View the [full schedule](#).
