

Engineering Permits

The Engineering Department reviews site work outside of your house or building, including work that coincides with Building and Zoning Permit applications. We issue [Street / Right-of-Way Opening Permits](#) (application includes Driveway Construction Permits), [Soil Disturbance and Hauling Permits](#), and [Tree Removal Applications](#). The Engineering Department staff reviews grading, land disturbance (clearing, tree removal, soil disturbance), soil importing and exporting, sidewalks, curbs, driveways, stormwater/drainage, development in environmentally sensitive areas, traffic control, sewer connections, and other forms of land use.

If you are not sure whether or not a permit is required, please call us to ask.

Applications are typically reviewed within 10 business days.
